

# Michael Panashe Mudimbu

Fullstack Software Developer | IT Professional | Systems Architect

michaelmudimbu@gmail.com • +263782464219 • Redcliff, Zimbabwe

## PROFESSIONAL PROFILES

- **Portfolio:** michaelmudimbu.netlify.app
- **Github:** github.com/micpana
- **LinkedIn:** linkedin.com/in/michael-panashe-mudimbu

## INTRODUCTION

Innovative Fullstack Software Developer and IT Professional with 7+ years of proven success delivering robust web, mobile, desktop, AI, and trading applications across freelance and corporate settings. I bring a rare blend of technical depth and creative problem-solving, with a strong focus on performance, reliability, and user-centric design. Passionate about building elegant, scalable systems that solve real-world problems, I thrive in fast-paced, collaborative teams where growth, adaptability, and excellence are valued. Always eager to learn, contribute, and exceed expectations, I'm committed to delivering solutions that not only work, but make a lasting impact.

## EDUCATION

- **Bachelor of Technology Honours Degree in Information Technology**  
Harare Institute of Technology (2016 – 2025; completed following a period of deferment)
- **Advanced Level**  
Kwekwe High School (2014 – 2015)  
2 Passes: Mathematics, Computer Science
- **Ordinary Level**  
Rio Tinto Zhombe High School (2010 – 2013)  
8 ZIMSEC Passes: English Language, History, Geography, Shona, Mathematics, Integrated Science, Biology, Physics  
1 HEXCO Pass: Computer Operations and Packages

## SKILLS & TECHNOLOGIES

- **Programming Languages:** Expert in Python, JavaScript, TypeScript, Solidity, and MQL5, with a focus on clean, optimized, and high-performance code.
- **Frameworks:** Experienced with FastAPI, Flask, React.js, React Native, and Express.js, enabling rapid development of scalable web and mobile applications.

- **Frontend Development:** Proficient in building responsive and intuitive interfaces using React.js and React Native for web and mobile platforms.
- **Backend Development:** Advanced experience with FastAPI, and Flask-based APIs, emphasizing secure, scalable, and efficient server-side architecture.
- **Databases:** Skilled in PostgreSQL, Supabase, MongoDB and SQL, delivering flexible, high-integrity data solutions across both NoSQL and relational database systems.
- **APIs & Real-Time Systems:** Strong command of RESTful APIs and WebSocket protocols for real-time communication and data synchronization.
- **AI & Machine Learning:** Hands-on experience in Python-driven ML/AI systems, including PyTorch, Computer Vision, OpenAI API integrations, supervised, unsupervised, and reinforcement learning models.
- **Chatbots:** Developed and deployed WhatsApp and Telegram bots with Python, enabling automated, intelligent messaging systems.
- **DevOps & Tooling:** Proficient in Git, Docker, and Nginx for efficient version control, containerization, and reverse proxy setup — ensuring smooth, scalable deployments.
- **Cloud & Deployment:** Experience deploying applications on AWS, Netlify, Vercel, Render, Heroku, Servarica, Ionos, and the Google Play Store; skilled in configuring and managing Ubuntu servers with Nginx for production-grade performance.
- **Debugging & Optimization:** Strong analytical skills in debugging, profiling, and optimizing code to maximize performance and reliability.
- **Software Methodologies:** Experienced in Agile and Scrum, contributing to fast-moving teams, iterative development, and transparent collaboration.
- **Distributed Systems:** Competent in designing and deploying distributed architectures that ensure scalability, fault tolerance, and high availability.

## EXPERIENCE

- **Software Developer (Fullstack & AI)**  
**Nuvantica Software (Czech Republic – Remote) | September 2025 – Present**  
**Responsibilities:**
  - Architecting and developing AI-dense software solutions using a fullstack architecture comprising React, TypeScript, and Tailwind CSS on the frontend, with Python and FastAPI on the backend.
  - Implementing advanced AI capabilities, including Computer Vision and LLM integrations.
  - Managing production deployments on Ubuntu servers using Nginx and ASGI, ensuring high availability and performance.
  - Designing and maintaining robust PostgreSQL database schemas for complex data requirements.
- **Fullstack Software Developer**  
**Freelance | July 2019 – Present**  
**Responsibilities:**
  - Developing web applications using a ReactJS, Python, MongoDB, and REST API technology stack.
  - Building and maintaining websites and web applications for various clients.

- Developing mobile applications using React Native, Python, Supabase, MongoDB, and REST API technology stack.
  - Creating AI-driven systems using Python for various domains, including data analysis and automation.
- Fullstack Software Developer**  
**ESpace (Zimbabwe – Remote) | 2021 – 2023**  
**Responsibilities:**
  - Collaborated remotely as the primary Fullstack Developer, delivering web and mobile solutions for clients sourced by the agency.
  - Built scalable applications using ReactJS, React Native, Python, and MongoDB.
  - Translated client requirements into functional, high-performance software products within strict deadlines.
- Intern Fullstack Software Developer**  
**Health Informatics Training and Research Advancement Center (HITRAC) (Harare, Zimbabwe – On-site) | August 2018 – July 2019**  
**Responsibilities:**
  - Developed frontend components using ReactJS and mobile applications with React Native.
  - Assisted in backend development using Java Spring Boot.
  - Trained healthcare professionals on the use of Impilo, Zimbabwe's Electronic Health Records (EHR) system.
  - Provided on-the-ground support for EHR implementation at Arcadia Clinic and Mbare Poly Clinic.
- Intern Web Developer**  
**Hansole Investments (PVT) Ltd (Harare, Zimbabwe – On-site) | June 2018 – June 2018**  
**Responsibilities:**
  - Developed websites for clients using WordPress.
  - Managed bulk SMS platform operations, ensuring seamless delivery and performance.
  - Handled client communications, including renewal notices for domains and hosting.
