Professional Summary

Fullstack Software Engineer (AI & Systems) with 7+ years delivering production web, mobile, backend and AI systems. Experienced in full-stack engineering, LLM and computer-vision workflows, data pipelines, cloud infrastructure and production operations.

Education

Harare Institute of Technology **Harare, Zimbabwe**
Bachelor of Technology Honours in Information Technology *2025*

Professional Experience

Nuvantica Software (Renovality Group) **Czech Republic (Remote)**
Contract Fullstack Software Engineer (AI & Systems) *September 2025 – August 2026*

- Architected and delivered Skinraya, a production AI skincare platform, owning end-to-end development across the React frontend, backend APIs, PostgreSQL schema and cloud infrastructure.
- Developed computer-vision and LLM-powered workflows, integrating AI-driven recommendations into production functionality.
- Managed Linux production environments, Nginx reverse proxies, Docker, cloud infrastructure, security monitoring and automated deployments; conducted code reviews and enforced code-quality standards.

Omni Contact Centre (Econet Group) **Harare, Zimbabwe**
Customer Experience Associate & Sales Consultant *April 2026 – Present*

- Global Sales Consultant on a UK Diaspora Insurance campaign: outbound sales, client engagement and CRM accuracy in a compliance-conscious environment.
- Managed high-volume customer engagement; resolved retention challenges through negotiation and proactive problem-solving.

Freelance Client Projects **Local & International**
Freelance Fullstack Software Engineer & Software Architect *July 2023 – August 2025*

- Designed and delivered production SaaS applications, AI-powered WhatsApp and Telegram bots, and business-automation tools for international clients.
- Built backend services with Python, FastAPI, Flask and Node.js, paired with React and TypeScript frontends; implemented chatbot workflows, third-party API integrations, web scraping and browser automation.
- Managed Git workflows, CI/CD, cloud infrastructure, testing and deployment; maintained 99.9% uptime across cloud-hosted Linux environments; translated requirements into specifications, architectures and database designs.

ESpace **Harare, Zimbabwe**
Freelance Fullstack Software Engineer *February 2021 – July 2023*

- Delivered full-stack web and mobile applications for agency clients under Agile/Scrum timelines using React, React Native, Python and backend APIs; collaborated with Product Managers and remote stakeholders.

Freelance Client Projects **Local & International**
Freelance Fullstack Web Developer *July 2019 – January 2021*

- Developed websites, web applications and business systems; engineered REST APIs, relational database schemas and responsive UIs using HTML, CSS, JavaScript and Python; managed CI/CD, Git and cloud infrastructure.

Health Informatics Training and Research Advancement Centre (HITRAC) **Harare, Zimbabwe**
Intern Fullstack Software Developer *August 2018 – July 2019*

- Contributed to frontend and backend development for national health information systems using Java and React; supported user training and deployment of Zimbabwe's national Electronic Health Records (EHR) system, Impilo.

Professional Development

HP LIFE Foundation – Agile Project Management (2026)

Skills and Interests

- **Programming Languages:** Python, JavaScript, TypeScript, SQL
- **Frontend & Backend:** React, React Native, HTML5, CSS3, Tailwind CSS, Node.js, FastAPI, Flask, RESTful APIs, microservices, WebSockets, webhooks, WhatsApp Business API, Telegram Bot API
- **Databases:** PostgreSQL, MongoDB, Supabase, relational schema design, query optimization, data pipelines
- **AI, ML & Automation:** LLM integrations, RAG, OpenAI API, prompt engineering, TensorFlow, Keras, computer vision (OpenCV, MediaPipe), chatbots, web scraping, browser automation (Selenium, Playwright)
- **Cloud & DevOps:** AWS, Linux (Ubuntu), Docker, Nginx, Git, GitHub Actions, CI/CD, automated deployments, production monitoring
- **Engineering & Delivery:** Enterprise software architecture, code reviews, secure coding, testing, Agile/Scrum, requirements gathering, technical estimation, backlog prioritization, stakeholder collaboration, CRM accuracy, negotiation
- **Interests:** Applied AI, intelligent automation, full-stack product development, cloud systems, and data-driven digital products.
