# MICHAEL PANASHE MUDIMBU

## Senior Software Engineer & AI Systems Architect

Harare, Zimbabwe | +263 782 464 219 | michaelmudimbu@gmail.com
Portfolio: michaelmudimbu.vercel.app | LinkedIn: linkedin.com/in/michael-p-mudimbu | GitHub: github.com/micpana

## PROFESSIONAL SUMMARY

Senior Software Engineer and AI Systems Architect with 7+ years delivering production web, mobile, backend and AI systems. Experienced in full-stack engineering, LLM and computer-vision workflows, data pipelines, cloud infrastructure and production operations. Combines architecture and hands-on delivery with stakeholder and customer-facing sales/CRM experience at Omni Contact Centre (Econet Group).

## CORE COMPETENCIES

**Software Engineering:** Full-stack web/mobile, enterprise architecture, APIs, backend services, data models.

**AI & Automation:** LLM/RAG, TensorFlow/Keras, computer vision, recommendations, chatbots, datasets, browser automation.

**Data Systems:** SQL/NoSQL, relational design, pipelines, query optimization, reporting, health systems.

**Cloud & Operations:** AWS/Linux, Docker/Nginx, CI/CD, deployment, monitoring, security, reliability.

**Technical Delivery:** Requirements, estimation, Agile/Scrum, backlog, code reviews, stakeholder collaboration.

## PROFESSIONAL EXPERIENCE

### Omni Contact Centre (Econet Group) • Harare, Zimbabwe

**Customer Experience Associate & Sales Consultant** | *April 2026–Present*

- Global Sales Consultant, Diaspora Insurance UK financial-services campaign (July 2026–Present): conduct outbound sales and client engagement; maintain CRM accuracy and professional communication in a compliance-conscious environment.
- Outbound Customer Experience Associate (April–June 2026): managed high-volume customer engagement, service quality and operational efficiency; resolved retention challenges through negotiation and proactive problem-solving.
- Strengthened stakeholder communication, negotiation and customer-facing problem-solving skills relevant to digital products and services.

### Nuvantica Software (Renovality Group) • Czech Republic (Remote)

**Contract Fullstack Software Engineer (AI & Systems)** | *September 2025–August 2026*

- Served as the primary independent engineer designing, developing, deploying and scaling AI-powered enterprise software and backend services.
- Architected and delivered Skinraya, a production AI skincare platform, owning end-to-end development across its React frontend, backend APIs, PostgreSQL schema and cloud infrastructure.
- Developed computer-vision and LLM-powered workflows, integrating AI-driven recommendations into production application functionality.
- Managed Linux production environments, Nginx reverse proxies, Docker containerization, cloud infrastructure and security monitoring.
- Implemented proactive server monitoring and automated deployment practices focused on reliability, uptime and maintainability.
- Conducted technical reviews, enforced code-quality standards and collaborated with remote stakeholders to deliver production-ready features.

### Independent Fullstack Software Engineer • Freelance Client Projects (Worldwide)

**Independent Software Architect & Developer** | *July 2023–August 2025*

- Designed and delivered production SaaS applications, AI-powered WhatsApp and Telegram bots, and business-automation tools for international clients.
- Translated business requirements into technical specifications, system architectures, database designs, APIs and implementation plans; estimated work and prioritized backlogs.
- Built backend services with Python, FastAPI, Flask and Node.js, paired with frontend applications using React and TypeScript.
- Implemented chatbot workflows, third-party API integrations, web scraping and browser automation to support business-process interoperability.
- Managed Git workflows, CI/CD pipelines, cloud infrastructure, testing, deployment and ongoing production maintenance; maintained 99.9% uptime across cloud-hosted Linux environments.
- Managed technical execution from estimation and backlog prioritization through development, testing, deployment and maintenance; provided technical leadership and independent problem-solving.

### ESpace • Harare, Zimbabwe

**Freelance Fullstack Software Engineer** | *February 2021–July 2023*

- Delivered full-stack software solutions and client-facing web and mobile applications for agency clients under Agile/Scrum timelines.
- Designed and deployed applications using React, React Native, Python and backend APIs.
- Collaborated with Product Managers and remote stakeholders to review requirements, prioritize technical tasks and meet project specifications.
- Maintained Git and branch-management workflows, deployment scripts, application performance and ongoing maintenance.
- Contributed to technical problem-solving, code optimization and maintenance across client projects.

### Freelance Software Developer • Independent Client Projects

**Software Developer** | *July 2019–January 2021*

- Developed bespoke websites, web applications and business systems for local and international clients.
- Engineered REST APIs, relational database schemas and responsive user interfaces using HTML, CSS, JavaScript and Python.
- Managed software architecture, CI/CD pipelines, Git version control and cloud infrastructure, with reported 99.9% uptime and attention to system security.
- Delivered production software independently from requirements gathering through hosting and maintenance.

### Health Informatics Training and Research Advancement Centre (HITRAC) • Harare, Zimbabwe

**Intern Fullstack Software Developer** | *August 2018–July 2019*

- Contributed to frontend and backend development for national health information systems using Java and React.
- Supported technical deployment and maintenance of Zimbabwe's national Electronic Health Records (EHR) system, Impilo.
- Assisted with secure data pipelines and server environments aligned with national health informatics standards.

### Hansole Investments (PVT) Ltd • Harare, Zimbabwe

**Intern Web Developer** | *June 2018*

- Built and maintained WordPress websites for business clients and supported a bulk SMS platform used for customer communications.
- Managed hosting, domains and client support activities, gaining early experience with production systems and customer-facing technologies.

## EDUCATION

Bachelor of Technology Honours Degree in Information Technology | Harare Institute of Technology, Harare, Zimbabwe

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript, TypeScript, SQL, Bash scripting, Java.

**Frontend & UI:** React, React Native, HTML5, CSS3, Tailwind CSS, responsive UI design.

**Backend, Frameworks & APIs:** Node.js, FastAPI, Flask, RESTful APIs, microservices, WebSockets, webhooks, WhatsApp Business API, Telegram Bot API.

**Databases & Data Management:** PostgreSQL, MongoDB, Supabase, relational database and schema design, query optimization, data pipelines.

**AI, ML & Automation:** TensorFlow, Keras, OpenAI API, LLM integrations, RAG, prompt engineering, computer vision (OpenCV, MediaPipe), AI recommendation workflows, dataset engineering, WhatsApp/Telegram chatbot development, social-media data automation, web scraping and browser automation (Selenium, Playwright).

**Cloud, DevOps & Infrastructure:** Linux (Ubuntu), Docker, Nginx reverse proxies, AWS, Git and GitHub, CI/CD pipelines, GitHub Actions, cloud-server management and security, automated deployments, production monitoring.

**Engineering, Quality & Security:** Enterprise software architecture, secure coding, IT security best practices, code reviews, code-quality standards, testing, production debugging, performance optimization, application maintenance and reliability.

**Delivery, Data Quality & Collaboration:** Requirements gathering, technical specifications, technical estimation, backlog prioritization, Agile/Scrum, cross-functional and stakeholder collaboration, data labeling and annotation, Human-in-the-Loop QA, data quality management, customer engagement, CRM accuracy and negotiation.

## CERTIFICATIONS

- HP LIFE Foundation — Agile Project Management | 2026
- Elevify — Data Annotation | 2026
- The Forage — Data Labeling Job Simulation | 2026
- DataLense — Essentials of Data Labeling & Annotation for AI Development | 2026
- DataLense — Human-in-the-Loop (HITL) QA & Data Quality Management | 2026
