PROFESSIONAL SUMMARY

Fullstack Software Engineer with 7+ years building production web, mobile and AI systems for international clients and remote teams. Experienced in owning products end-to-end from architecture and development to deployment and infrastructure. Strong focus on AI integrations, SaaS platforms and scalable production systems.

Primary stack: Python, FastAPI, React, TypeScript, PostgreSQL, Docker and cloud deployment.

KEY HIGHLIGHTS

- 7+ years professional software development experience
- Built and deployed AI-powered production systems
- Experience working with international remote teams
- Strong end-to-end ownership from idea to deployment

TECHNICAL SKILLS

CORE TECH STACK

Python • JavaScript • TypeScript • React • React Native • FastAPI • Flask • Node.js • PostgreSQL • MongoDB • Supabase • Docker • Nginx • AWS • Ubuntu

AI & DATA

Machine Learning • Computer Vision • OpenAI API • LLM integrations • Automation • Chatbots

PRACTICES

REST APIs • WebSockets • Distributed Systems • Cloud Deployment • DevOps • Agile

EXPERIENCE

- Contract Fullstack Software Engineer (AI & Systems)**
Nuvantica Software, a Renovality company (Czech Republic - Remote) | September 2025 – Present
 - Primary external engineer responsible for building and deploying AI-powered systems
 - Lead developer for the Skinraya AI skincare analysis platform (<https://app.skinraya.cz>)
 - Design and implement fullstack applications using React, TypeScript and FastAPI
 - Build computer vision and LLM-driven workflows used in production
 - Design PostgreSQL data architecture and backend services
 - Manage Ubuntu servers, Nginx and deployment infrastructure
 - Deliver complete features independently from concept to production
- Customer Experience Associate - Outbound**
Omni Contact Centre (Harare, Zimbabwe - On-site) | April 2026 – Present
 - Conduct outbound customer engagement campaigns, providing product and service information while maintaining high customer experience standards.
 - Handle enquiries, feedback, and issue resolution, identifying customer needs and recommending solutions to improve satisfaction and retention.
 - Maintain accurate customer records in CRM and internal systems while ensuring compliance with company policies, quality standards, and service procedures.
 - Collaborate with internal teams to escalate and resolve customer concerns efficiently and in a timely manner.
 - Monitor campaign performance, provide feedback on engagement strategies, and consistently meet customer engagement, productivity, and service quality targets.
 - Strengthen communication, active listening, negotiation, and relationship management skills through direct customer interactions.
- Fullstack Software Developer**
Freelance (Worldwide - Remote) | July 2019 – Present
 - Design and build production web and mobile applications for international clients
 - Develop fullstack systems using React, Python and REST APIs
 - Build AI automation tools, data systems and messaging bots
 - Handle cloud deployment, infrastructure and production maintenance
 - Regularly deliver complete systems independently from concept to production
- Contract Fullstack Software Developer**
ESpace (Harare, Zimbabwe - Remote) | 2021 – 2023
 - Served as the dedicated external engineer delivering software solutions for agency clients
 - Designed and built fullstack web and mobile applications using React, React Native and Python
 - Translated client requirements directly into production-ready systems

- Worked independently as the sole engineer on assigned projects
- Handled deployment, debugging and ongoing system improvements
- **Intern Fullstack Software Developer**
Health Informatics Training and Research Advancement Center (HITRAC) (Harare, Zimbabwe - On-site) | August 2018 – July 2019
 - Developed frontend components using React and mobile applications using React Native
 - Contributed to backend development using Java Spring Boot
 - Trained healthcare professionals on the use of Zimbabwe's national Electronic Health Records system (Impilo)
 - Provided on-site technical support during EHR implementation at healthcare facilities
 - Gained experience working on real-world health information systems
- **Intern Web Developer**
Hansole Investments (PVT) Ltd (Harare, Zimbabwe - On-site) | June 2018 – June 2018
 - Built and maintained client websites using WordPress
 - Supported operations of a bulk SMS platform ensuring reliable message delivery
 - Managed domain and hosting renewals and communicated directly with clients
 - Gained early experience working with production systems and real business workflows

KEY PROJECT

Skinraya - AI Skincare Analysis Platform

Built under Nuvantica Software (a Renovality company)

Project: <https://app.skinraya.cz>

Fullstack AI platform built end-to-end for real-world production use.

- Built and maintained the frontend, backend and AI pipeline
- Implemented computer vision-based skin analysis workflows
- Integrated AI-driven skincare recommendations
- Deployed and managed full production infrastructure
- Used as a live production AI application by real users

EDUCATION

Bachelor of Technology Honours Degree in Information Technology

Harare Institute of Technology
